Dear Proprietor

Your MOT testing station is under threat, and so are 21,000 others nationwide.

There's a proposed EU law attacking the way we test cars in the UK today. Under this law, if a car fails its MOT, the owner will have to take it somewhere else to be fixed. We both know what a problem this will cause every MOT Testing Station in Britain today offering both tests and repairs.

It will be a nightmare for Britain's motorists. 40% of them fail the MOT and they will have to make three journeys to get their pass certificate - one for the failed test, another for repairs and another for a re-test.

MOTs will cost everyone more - Testing Stations will have to make all their money from MOTs, so they'll have no income from repairs and no cushion for customer discounts. Many stations will be forced to stop testing altogether, so customers will have to drive miles for tests and book them way ahead.

This way of doing MOTs may work for the rest of Europe, but **three of the EU countries with the safest roads use our test and repair model** (Malta, Holland and the UK). Road safety is life or death. It's not something that should be left to the whims of out-of-touch politicians on the continent.

The EU doesn't know what's best for our MOT Testing Stations, or for our people. 75% of the laws governing Britain are now made by Brussels. This simply can't go on. It's time for us to act.

We must all send a clear message that we won't be pushed around like this any more. **I've enclosed a petition with this letter - please gather as many signatures as you can to oppose this unfair and unwanted law.** Send them back to me and I'll make sure your voices are heard loud and clear in Brussels.

The EU already has more control over our lives than our own elected Government and it wants more. We must return the government of Britain to Britain. **Let's show them we won't take this bullying lying down.**

UKIP cares about what EU laws are doing to all of our lives. The other parties have shut their eyes to the devastation EU bungling is causing all of us, every day. You can help us make a real difference, just by signing up.

Join UKIP today and you can help us make a change, help us make the voices of normal people heard - the voices of people like you and me who have to deal with the consequences of the Eurocrats' irresponsible actions.

Your support could change our country for good. In the past, people gave their lives to ensure that Britain stayed free and independent. All you have to do is sign our petition, and join us.

Every new member will help build a better, brighter, freer, and richer future for the country we both love.

Yours sincerely,

Nigel Farage MEP

Leader, UK Independence Party

1 The EU wants to stop you testing and repairing your customers' cars.

Have you heard the latest proposal from Brussels telling us how to run our lives?

This one strikes at the very heart of your livelihood.

The EU's proposed law says that MOT testing centres will have to be separated from where the vehicle is repaired.

If they get their way, you won't be able to test and repair cars in the same place any more.

2 You'll lose money - and so will your customers.

Your MOT centre will lose all the money from repairs. Your customers will not only have to pay more, they'll have to make more journeys.

Your working life will be changed forever. And your income.

And it won't just be you that suffers. This law will affect 21,000 Testing Stations around the UK.

The only people who'll benefit are the big companies who can set up large Testing-only Stations at a moment's notice - threatening all the small garages who have worked so hard to build up their business.

The EU says we need this law because doing testing and repairs together is bad for road safety.

So how does that square with the UK having one of the best road safety records in Europe?

3 Who can help you fight this? UKIP.

75% of all our laws are already decided in Brussels.

So what can you do about it? Join UKIP and stand up to the EU bullies.

Sign our petition and make your voice heard.

Together, we can fight this new threat to our way of life.
